

DESIGN + BUILD OF BEST SUPPLY'S RETAIL, OFFICE & WAREHOUSE FACILITY

North Canton, Ohio

Warehouse

Project Description:

Cleveland Construction, Inc. (CCI) provided a truly unique building solution for Best Supply's newest 50,000-sf warehouse facility. Unlike other general contractors, CCI was able to be a "one stop shop" for all phases of the project. Best Supply relied upon CCI to deliver a complete package, from site selection to building construction, on time and within budget. CCI's resources from top to bottom were called upon to deliver the project within Best's perimeters. This project afforded us the opportunity to pool our vast resources and involve nearly every discipline CCI has to offer. This combined team produced a streamlined project to bring Best's vision to reality.

"It was nice to have one go to guy to see this project through from conception to construction. It's rare these days to find one sole dependable source that can do it all. By having Cleveland involved from day one, we were able to reduce overall construction costs and compress the timelines of construction. And, their staff was professional and responsive to our needs from day one."

Ed Marco, General Manager, Best Supply

Owner: Best Supply

Architect: Dyer & Castrovillari

Scope of Work: Design + Build

Completion Date: December 2005
