

CHRIST HOSPITAL – HEART CENTER

CINCINNATI, OHIO

Project Details and Specifications:

The Heart Center stands four stories high, with its own lobby and driveway for easy entry on the hospital's west campus.

The Heart Center's features include:

- New emergency department with 30 private patient rooms, plus 2 trauma rooms.
- 35-bed cardiovascular step-down unit.
- 16-bed cardiovascular intensive care and recovery unit, located next to the heart operating rooms.
- 12-bed surgical intensive care unit.
- State-of-the-art technology for patients, physicians and nurses that allows for more efficient care.
- Rooftop garden overlooking the river and city for patients and families. Patients' monitoring equipment also works in the rooftop garden, allowing them greater freedom of movement.
- Over-sized patient rooms with floor-to-ceiling windows that look onto wooded grounds.
- A flood of natural light, provided by hidden skylights, creating a healing environment.
- High-end design features, including natural woods, marble, stainless steel and innovative window design.
- Asian-inspired rock gardens and water terraces.
- Quiet areas of respite both indoors and outdoors for patients and visitors.

Cleveland Construction, Inc. successfully completed the General Trades package for this monumental project.
